Steve Koenigsberg, Jim Graydon join Brown and Caldwell

WALNUT CREEK, Calif., June 22, 2012 — Brown and Caldwell, a leading nationwide environmental engineering consulting firm, today announced that Stephen Koenigsberg, Ph.D., and James Graydon, P.E., LEEP AP, have joined the firm, each assuming key leadership roles for the company.

Steve Koenigsberg joins BC as the director of advanced remediation technologies and solutions. He brings more than three decades of environmental science and engineering experience, and is a leader in the development and application of innovative in-situ and on-site treatment protocols. In addition, he has helped define the emergent field of expedited site closure over the last decade and is the principal inventor of four key patents in the field of remediation. Koenigsberg has authored more than 175 technical articles on remediation and environmental biotechnology, and serves as an adjunct professor at The California State University at Fullerton. He earned a bachelor’s degree in biology from The City University of New York, and master’s and doctorate degrees in agricultural biotechnology from Cornell University. Working from the company’s Irvine, Calif. office, Koenigsberg will contribute to growing the company’s national key client program within the private sector and federal agencies.

Jim Graydon joins the firm’s California leadership team as the area leader for Northern California. Graydon brings 25 years of experience in planning, permitting and design of water-related infrastructure and treatment systems and works from the company’s Walnut Creek, Calif. office. He will be focused on growing the firm’s business in Northern California – ensuring a commitment to client-centered solutions and market-driven initiatives – and looks to further establish BC’s status as a trusted advisor to the area’s public, private sector and federal clients. Prior to joining BC, Graydon worked at Kennedy/Jenks where he held positions as area leader, national business development director, and federal programs director. He earned his master’s degree in environmental engineering from Stanford University, and is a registered civil engineer and LEED Accredited Professional.

Steve Koenigsberg can be reached at BC’s Irvine office at 714-689-4800. Jim Graydon is based in the Walnut Creek office at 925-210-2431.

About Brown and Caldwell

Since 1947, Brown and Caldwell has delivered innovative, enduring environmental solutions for municipalities, private industry and government agencies throughout the United States.
